FOR IMMEDIATE RELEASE

Dallas Businesses Now Have a Solution for Reducing Costs and Downtime Due to Data Loss

ActionFront's 5th Full-Service Facility Retrieves Lost Data

Dallas, March 15, 2004 – ActionFront Data Recovery Labs, the leader in retrieving data from downed or inaccessible computers, backups, servers and corrupted or deleted file sets, today announced it has opened a facility in Dallas, Texas at 14643 Dallas Parkway.

“In response to customer demand and part of a continuing plan to bring professional in-lab data recovery services to local markets across the nation, this full service facility will provide data loss victims of all types, from notebook users to managers of enterprise storage, local access to the world’s best data recovery services,” said Nick Majors, President of ActionFront. “Our ActionFront Critical Response teams are available 24/7 to restore business-critical operations.”

ActionFront restores lost data from all types of digital media including hard drives, tape cartridges, photo cards, network servers, (RAID, NAS, SAN), tape autoloaders and optical jukeboxes and from corrupted file sets in software platforms such as SQL, Oracle and Exchange Server.

The company’s technical and customer service teams provide free evaluations, at a “no files, no charge policy,” quick turn-around and solutions that guarantee the return of usable data.

About ActionFront

ActionFront recovers lost information from downed or inaccessible computers, backups, servers and corrupted or deleted file sets. Serving thousands of personal and business customers each year since 1989, lost data is retrieved from all types of digital media including hard drives, tape cartridges, photo cards, network servers, (RAID, NAS, SAN), tape autoloaders and optical jukeboxes and from corrupted file sets in software platforms such as SQL, Oracle and Exchange Server. ActionFront is ISO 9001: 2000 certified and serves customers from locations in Atlanta, Buffalo, Chicago, Dallas, Santa Clara, Toronto and Tokyo.
